Donations of \$20 - \$200 sliding scale are suggested. Contributions are to help support C.L.E.A.R. legal defense and to offset Freedom Hub local and provincial newsletter expenses. For many years, C.L.E.A.R has been tirelessly educating and empowering people across Canada to uphold our fundamental and inherent rights, however the city of Kelowna has taken C.L.E.A.R to court and is attempting to prevent freedom protests through a very costly supreme court challenge. If the city succeeds this could set a precedent across Canada and enable other cities throughout our country to also prevent protests. Peaceful rallies and protests are an integral way for people to voice their opposition to government over reach and are upheld under our charter of fundamental rights and freedoms.

This fundraiser requires community volunteers before and during the event. Please consider contacting us in advance, to donate to the silent auction and/or to volunteer and we'll provide you with a list of tasks to choose from.

4:30 pm PST – A4C Orientation

4:45 pm PST – Tanya's update

5pm PST/8pm EST – Empower Hour guest segment

Special Guest Dr Ann Gillies, Trauma Specialist, Author and Speaker, joins Tanya to discuss the results of her most recent study and her newest book, **The Ultimate Deception: Learning the Truth About Gender-Affirming Care**. Dr Ann is passionate about putting her research to work for the well-being of children and for parents who are being assaulted and victimized by radical sex activists who have infiltrated our education system at all levels, and are teaching the destructive and unscientific gender ideology.

Children are being indoctrinated and conditioned to embrace gender ideology which is confusing them and causing them to question their identity. This is resulting in a mass social contagion wherein children are self-identifying as the opposite sex and 'Gender Affirmation' is being forced on vulnerable children as the only solution which is leading them down a path of destruction; mentally, emotionally and physically. The poison of 'Gender Affirming Care' sets a child's mind on things that 'ought not be' and propitiates the ultimate deception. The only antidote is truth.

Dr Ann will also share her experience of how compassionate understanding and patient love can bring healing and restoration to relationships affected by this pernicious agenda. [Learn more about our guest and Share the Empower HERE.](#)
