

Supreme Court file no. KEL-S-S-136195
Kelowna Registry
Affidavit # 2 of David Lindsay
Affirmed the 6th day of November, 2023

In the name of Yahveh (God)

In the Supreme Court of British Columbia

Between:

City of Kelowna,

Petitioner, Respondent,

-v-

Unknown Persons Operating as "Common Law Education and Rights", David Lindsay,
John Doe, Jane Doe, and Persons Unknown,

Applicants, Respondents,

-and-

Attorney General of British Columbia.

Affidavit # 2 of David Lindsay **Affirmed this 6th day of November, 2023**

I, David Lindsay, of the City of Penticton, in the Province of British Columbia,

affirm and say that:

1. I am a Respondent in this matter and as such have personal knowledge of the facts herein deposed to by me, except where same is stated to be based on information and belief in which case I do verily believe same to be true.
2. I am making this Affidavit in support of my Application pursuant to the *Protection of Public Participation Act*, (SLAPP). I am also relying upon my Affidavit #1 in support of this SLAPP Application.
3. In my Affidavit #1, I evidenced The Source that I met with and who is with the City of Kelowna. The Source further informed me that there had been no complaints, especially of a formal nature, filed with the City in relation to the Lawful Protests we were having at Stuart Park. This is important as I believe that the City is going to try and falsify some complaints in my case or make false evidence and claims of same.
4. On October, 14, 2023, various LGBTQ had a protest at Stuart Park, with sound amplification equipment. It is my understanding and belief that they did not have a permit to so do.
5. At this protest, some of these people chalked almost the entire concrete area of Stuart Park, a sample of which is visibly seen in Video Exhibit "DDDD" at about 1:15 seconds to this Affidavit. Virtually no area was left untouched, including the stage area we use facing City Hall.

6. This chalking remained in place for over a week, and was still there when we arrived for our protest on Oct. 21, 2023. The City, despite knowing it was there being directly across the street from them, made no attempt to clean this up.
7. Previously, one person at one of our Lawful Protests whom I did not know, made minor chalking on the stage facing the rink and the sidewalk. I was informed that this person was charged with an offence and later either found not guilty or the charges did not proceed. The chalk was cleaned up with a day or two. Myself and our group and all protestors, are continually treated by the City much differently, prejudicially, unequally and harshly than anyone else.
8. I made inquiries to obtain a copy of the CCTV video from the Zamboni storage facility, however Mr. Fleming would not release it nor tell me if anyone was charged with any offences. This camera will have caught everyone who was chalking. Sarak Stokes from the City, evidenced in her Affidavit #1 in this case with the City, that they keep these camera videos for 30 days, so the City should have them until at least November 14, 2023.
9. At our Lawful Protest on Oct. 15, 2023 at Stuart Park, a significant number of paid LGBTQ counter protestors arrived early, being bussed there from a local union. I asked several of them if they had a permit as they too had some form of sound amplification equipment. I was told that they did not have a permit.
10. I emailed Stephen Fleming, the Clerk with the City of Kelowna, and inquired if they had a permit to be there for their previous Oct. 15, 2023 protest, or for the use of sound amplification equipment. I was told that they did not have any permit. I was not informed if any of them were charged despite my inquiries. I was told it would be sent to Bylaw department. I have not been contacted by them as of yet.

See attached Exhibit "A" Copy of email thread between myself and Stephen Fleming

11. I caught one woman from this LGBTQ group chalking the sidewalk and took a short video of her including some picture.

See attached Exhibit "B" Copy of picture of LGBTQ woman chalking sidewalk, Oct. 21, 2023

12. On September 17, 2023, a group of climate activists had a protest at City Hall. I attended to counter protest them along with several others. One of our supporters, Bruce, recorded some of this event, showing that they were using sound amplification equipment. I had discussions with a few people in attendance on various issues including whether they had obtained a permit. I was informed that no permit was obtained.
13. On Sept. 20, 2023, at the children's march in Vernon, held at Polson Park where I have been and personally spoken on many occasions, I was told from Jacquelyn Rose Jones, one of the singers and MC for this protest and who had filed an Affidavit in this case, that the people who arrived early to set up, were approached by Vernon Bylaw Officers and threatened to take their sound system down or tickets would be issued.
14. Jacqui informs me that there were over 500 people in attendance that day and talking without the sound equipment would not have been possible.

15. This is exactly what I predicted when I was served with the Petition and supporting documents in this case, where other cities across the Province would soon start to prohibit or prevent people from protesting against various harms or issues in society, that the Governments did not approve of, yet they would sanction those that they did approve of. This would hit people such as our protest groups who opposed all the COVID-19 restrictions and lockdowns by the Government and various other activities that they are now promoting, such as 15 minute prison cities, and threats of Government digital ID and currency.
16. I am extremely worried about the floodgates being opened if the City was to be successful in any way. Soon, the Provincial and Federal Governments, who have supported the media with various grants into the millions of dollars, would shut us down and the only available source of information to counter what the Government is doing, is the very same Government. The problem with online is that we do not get the desired nor effective public visibility that is so crucial to our success. I have read about events in Australia and the U.K. now where those Governments are actively legislating for offences for anyone who publishes on line anything against the Government narratives.
17. I do verily believe that our case is extremely strong, with so many cases supporting our position even from the Supreme Court of Canada. At the same time, I know how corrupt municipal institutions are and can be. I also know, from inside City of Kelowna sources, that the Province is strongly pushing them to shut us down as well.
18. At times I have heard various people from the City, and on a rare occasion from a couple of our protestors, refer to our CLEAR Canopy as a 'tent'. As I evidenced in my Affidavit #1, it is by definition and structure, a canopy not a tent as used in the *Parks Bylaw*. I have talked to people and corrected them as to the correct description of our Canopy to correct this error. I believe people were, if using the word 'tent', doing so colloquially and metaphorically, possibly for ease of speech. I was told by people it is just much easier to call it a 'tent', but I stressed the importance of referring to it by its proper descriptive name.
19. I have done some further research into the canopy v tent issue. I am attaching hereto a copy of some of the websites I visited and their representations that I am correct that the CLEAR Canopy is not a tent as used in the Bylaws. It is temporary and removed after each use. Tents have four walls and can be slept in, with a bottom to it to prevent moisture leakage. Gazebos are more permanent structures, usually anchored into the ground, where a canopy has a peaked top like the CLEAR Canopy and is not a permanent structure.

See attached Exhibit "C" Copy from Websites on differences between canopy/tent/gazebo
<https://www.costco.com/gazebos.html>

Canopy v Tent - Canopy Tent Advisor -- <https://canopytentadvisor.com/whats-difference-canopy-tent/>

20. Despite having about 10-12 Lawful Marches over about two years, I was issued no tickets in relation to them, nor for using a megaphone during these Marches. We occupied one street lane and for about half of these, we had police traffic control for the entire March in downtown Kelowna. I was never given any warnings from any Bylaw Officers or RCMP or City officials or that I would be ticketed for so doing.

21. At no time did the City post any signs declaring that sound equipment could not be used in Stuart Park.
22. At no time during our Lawful Protests, Lawful Marches or Lawful Street Protests, did we ever force a captive audience upon anyone. People were always free to join and leave at will, or they could just pass us by. People never had any problems walking down sidewalks that I ever saw, and I had a good vantage point to see them from up on the stage area. I never witnessed anyone turn around and leave or walk across the street to avoid us, or walking by us.
23. The reason and benefits for choosing Stuart Park and downtown Kelowna including for the Lawful Protests and Marches include but are not restricted to the following considerations:
 - A. there is significant amount of parking available in walking distance, including for larger vehicles;
 - B. it is centralized to attract people from West Kelowna and other areas of the City;
 - C. it is directly across from City Hall, for political visibility and messages, including buses, and trucks; Lawful Protests;
 - D. it is within walking distance of the downtown major bus loop connecting to all parts of the City;
 - E. there are significant numbers of people on the boardwalk and doing walkthroughs – many of these people are different from week to week and include tourists;
 - F. it has excellent access to parking on Water St., for further visibility of our vehicles and their signs;
 - G. it has excellent visibility for our signs in the actual Park;
 - H. it has many benches for seniors and others to sit;
 - I. we can have many protestors without using the entire Park;
 - J. it has an excellent stage with places for people to speak, including myself;
 - K. there is a large area, so at most of the Lawful Protests people are not jammed into each other;
 - L. the Park was funded, designed and built to accommodate Lawful Protests such as ours; it is the very purpose the Park was constructed for and its design facilitates the Applicants' common law and s. 2 Charter freedoms;
 - M. with our speaker system, we have excellent and reasonable sound communications;
 - N. it has excellent esthetics and beauty;
 - O. there is an excellent otherwise unused grass area for literature tables and our CLEAR Canopy;
 - P. it allows people to relax after the protests on warm days, right next to the lake, and accessible to many local downtown businesses that are frequented thereafter;
 - Q. it is close to other political venues that we protest against, including City Hall, RCMP, the local media, and Interior Health;
 - R. it is in a commercial area, not residential, so there is no impact on residential communities;
 - S. it is an excellent starting base for Lawful Protests at other downtown areas;

- T. it is within walking distance to Hwy 97 which has been used for maximum public visibility from vehicular traffic;
 - U. there is excellent visibility from Water St. and which has been used to maximize public visibility from vehicular traffic in that area;
 - V. the Park provides an excellent starting and ending point for short Lawful Marches in the downtown area, without the loss of protestors;
 - W. it is within walking distance of Kerry Park as a substitutional area with many of these same attributes, if Stuart Park has on the rare occasion, been booked by another group;
 - X. it was my choice to make in the exercise of my common law and s. 2 Charter freedoms;
 - Y. no other protests take place at other parks in the City – only Stuart Park or Kerry Park. That is where the action is...that is the most effective area in the City to so do; and,
 - Z. is generally the best and most effective place in the City for our Lawful Protests to occur.
24. Moving to another location outside the City core and present location, is absurd and unreasonable, and is being requested only to give injustice the colour of justice. Amongst other non-exhaustive problems and considerations we would encounter:
- A. it denies to the Applicants all of these aforementioned benefits and Constitutional freedoms;
 - B. the importance of the Applicants' messages, *a fortiori* where the B.C. Government has ordered all media not to publish anything by protestors opposing the Government narrative. Locating the Applicants in an area of little visibility or effectiveness, defeats the purpose of s. 2 of the Charter and gives the Petitioner and B.C. Government in the background complete monopoly over information in the public;
 - C. it puts a wall between the Applicants and the public on political issues of major societal importance, and removes the effectiveness of the Lawful Protests as most other parks or areas have very few people there;
 - D. the City will simply then, enforce any such relief against the Applicants in other areas of the City, effectively using this as a platform to ban them everywhere. It allows them to do what they could not do directly by seeking relief up front to ban the Applicants everywhere in the City;
 - E. virtually all, if not all protests occur downtown at Stuart Park, or alternatively, Kerry Park, by all protest groups, due to its effectiveness and visibility. People do not protest at parks in the suburbs;
 - F. there is no other place for the Applicants to go, especially of such an effective location. Not all parks are created equal;
 - G. all other parks bring a host of problems that are simply not present at Stuart Park, such as parking, residential complaints, children playing, and lack of visibility and credibility – out of sight out of mind for the Petitioner's benefit;
 - H. forcing the Applicants into areas not of their volition, is a s. 2 Charter violation;
 - I. it is not possible to have people speaking on sidewalks, nor to set up literature tables, imposing serious restrictions on their freedom of expression, denying people their right to hear professionals and other people speaking, in part due to volume of noise from traffic immediately adjacent to the sidewalk, cars splashing water or dirt on people etc.;

- J. there are no stages in other parks and to purchase materials, build and take down such a stage after every Lawful Protest, would be unreasonably time consuming, and require more vehicles and storage areas than is available;
- K. people in the vicinity of suburban parks all generally live in the area and it seriously restricts the Applicants' ability to express themselves to new people;
- L. all or virtually all parks considered in all major cities in Canada for protests, are in the downtown core areas;
- M. the Applicants would lose downtown visibility and recognition;
- N. other locations would raise a host of parking issues not present in the downtown core area and seriously restrict the number of people that can be attracted to the Lawful Protests;
- O. because of the nature of the Kelowna downtown area, the sound is limited in its area. At suburban parks, the sound is likely to carry to a much farther distance and possibly cause other issues in that regard that again, are simply not present downtown;
- P. it would also seriously limit or completely deny the effectiveness of the Lawful Marches, in part because distances are much greater to travel than the downtown area;
- Q. where the MSM is only publishing the Government narrative, this seriously denies or restricts the effectiveness of the Applicants getting information out to the public and for the public to obtain accurate, alternative information as well;
- R. it removes the presence of the Applicants out of the public mind and consciousness, who in turn eventually forget about them, again, restricting or denying their common law and s. 2 Charter freedoms;
- S. almost all other areas of the City are not designed to accommodate large numbers of people if and when Government actions stir up anger in people to bring such numbers to the Lawful Protests;
- T. almost all other areas of the City with a large surface area, are private in nature and do not permit such protests, including Orchard Park Mall;
- U. if the Lawful Protests are in any way bifurcated, this will result in many people leaving and not returning, restricting or denying the Applicants' common law and s. 2 Charter freedoms further;
- V. this will have a demoralizing effect on all protestors. The downtown has a certain and higher energy and character than the suburbs and supports such Lawful Protests and Marches;
- W. this would set a dangerous precedent to permit municipalities and Governments the power to ban protests that they do not approve of, or relocate protests to much less effective areas, under the colour of restrictive Bylaw application, and effectively usurps the Applicants' Constitutional freedom to choose their own location, which is now determined by the Government;
- X. this permits the City, in this case, to discriminate based on political beliefs, under the guise of Bylaw enforcement;
- Y. the City would then simply issue tickets and/or apply to the Court using this case as a precedent, to ban the Applicants from other parks, shutting them out of the entire City;
- Z. there would be serious uncertainty for protestors who would lose the benefit of certainty in their Lawful Activities;

- a. any claims by the City of harm, are speculative, hypothetical, *di minimus*, trifling, a minor inconvenience, and/or part of the inconveniences the public accepts by other members of the public exercising their Constitutional freedoms.

25. I am including a copy of the following videos that I will be relying upon in support of my SLAPP Application. All will be included on the attached Exhibit "D" memory stick. I have confirmed that each memory stick has the exact same file size as I have attached hereto, that being 31,296,336,486 bytes. Many of these recordings will evidence the problems that we would face without sound equipment.

To: Stephen Fleming <sfleming@kelowna.ca>
Subject: Permit

CAUTION: External email - Check before you click!

Mr. Fleming

As per our discussion at the recent City Hall Council meeting this past Monday, I inquired if the group of people the previous Sunday, October 15 obtained a permit for their protest or event as the case may be, including for sound equipment and putting chalk on the public sidewalks.

You informed me that you would get back to me on Tuesday however I have not yet heard from you.

Can you please advise me if this group or persons obtained a permit and provide me with a copy if so?

Thank you very much

David Lindsay

Subject: permits

CAUTION: External email - Check before you click!

Mr. Fleming

I have some serious concerns and questions I am putting to your for your immediate attention and reply.

In addition to my previous email, I bring to your further attention that there were a large number of 'counter-protestors' on Saturday at Stuart Park.

Can you please advise me if any of them obtained a permit to appear to protest, and for the use of sound amplification equipment for Sat., October 21, 2023?

Further, at, during or prior to the LGBTQ protest last Sunday, October, 15, 2023, at Stuart Park, many of these people littered the entire concrete area of Stuart Park with graffiti, including all stairs, platforms and stages, walkways, sidewalks, the skating rink area, and even the pillars for the Bear statute itself

I am requesting a copy of the CCTV video footage from above the skating rink area and any other camera that is focused on this Stuart Park area, which will show all those persons who committed this vandalism. As your Bylaw Officers appear unwilling to charge these people, than pursuant to the *Offence Act* I will consider so doing. The CCTV video, which your witness in my case, Sarah Stokes evidenced at para. 2 of her Dec. 20, 2022 Affidavit, that you retain all such video footage for 30 days.

Further, did your Bylaw officers lay any charges in connection with this graffiti vandalism by these people? If not, why?

Further, were any Bylaw officers present at this Oct. 15, 2023 protest to lay charges, and if not, why not?

Here is a picture of a woman from the LGBTQ activists this past Saturday, Oct. 21, 2023 that I personally took, along with a very small shot of some of the graffiti that was present.

I do have access to videos showing all other chalked graffiti as well.

Notice how all these vandals are always wearing masks to conceal their ID?

Why did your Bylaw officers not attend on this date (Oct. 21, 2023) and lay the appropriate charges? They do have the power of arrest and could have so done, especially with six (6) members of the RCMP present at all times for additional protection.

Finally, this graffiti, which was chalked on the concrete prior to Oct. 15, 2023, remains in place and no one from the City has made any attempt to remove it. I would like to know why this is so, especially after claims were made that one person from our protests allegedly put chalk statements on a very small part of the stage and concrete earlier this year (charges were either dropped or found not guilty), and the chalked words were removed in a matter of two-three days?

I look forward to your detailed and responsive answers to my aforementioned questions and points as soon as possible, as well as from my previous email last week.

Thank you

David Lindsay

What's the Difference Between Canopy and Tent?

March 2, 2018 by Jason Clarke

What's the Difference Between Canopy and Tent?

March 2, 2018 by Jason Clarke

When you're planning to represent yourself at an event, chances are you've considered some type of temporary structure. In that case, canopies and tents are your two main options. But what's the difference? In essence, the main difference between the two is the walls.

A tent is enclosed from all sides, and is overall a more heavy-duty structure designed to provide all-round shelter. A lot of tents are designed to be slept in, and they come in a variety of sizes from the very small to enormous marquee-style tents that can accommodate a lot of people at once.

A canopy, on the other hand, is a more temporary solution. They tend to be more lightweight, are open at the sides and provide a more basic shelter and place to store any stock, merchandise or equipment you may have with you. So, which is the best option for your event?

Read Related Article: [How to Weigh Down a Pop-up Canopy?](#)

Here are the main features of each option:

Canopy Features:

- Although you can get canopies in different shapes, by and large they have a pyramid-shaped top
- They consist of a lightweight frame with a cover over the top
- They are reasonably easy to put up and move from place-to-place, and can usually be put up by just one person if necessary
- The sides are uncovered, so the space underneath the canopy is open

Tent Features:

- These are all-round more heavy-duty and weather resistant than canopies
- They have sides, so they protect you from the wind and rain from all angles

- Tents come in an enormous variety of sizes, and can be much larger than canopies
- They come in a variety of shapes and styles, so you can be pretty sure that you'll find something to suit the overall look and function you're going for

Is a canopy the right choice for me?

Many people opt for canopies for events, especially if they want something lightweight that can be easily moved around. The great thing about canopies is that they can be put up easily by one person if needs be, as they don't need to be staked down or require the use of guy ropes.

Canopies are usually weather-proof, so they will protect you from wind, rain and strong sunlight during the event. Check out the [best canopy for wind and rain](#)

On the other hand, as they don't have walls they won't give you the same protection that a tent offers.

It's worth noting, however, that there are some canopy models on the market that have attachable walls if you want the benefits of a canopy with extra protection.

If you're hoping to make a big impact, then your canopy can be customized to suit you. Using either screen or digital printing, you can have your logo or key information emblazoned on it to make your brand identity clear and draw attention.

You can also choose from a wide range of colors, so if your brand has a color scheme this can be reflected in your choice of canopy.

Should I go for a tent?

If you're looking for something a little larger, or for more protection from the weather, then a tent may be the way to go. From small canopy-sized models to enormous [tents that can fit](#) hundreds of people inside, tents come in a wider range of shapes and sizes than canopies.

As they have walls, they offer superior protection from adverse weather conditions, and the durable nature of tents makes them a long-lasting option. If you don't want to invest in your own tent, some companies offer rental options when you only need use of a tent for a short time.

Whilst tents are more resistant to wind and rain and made of more durable materials, it's important to remember that they take a bit of know-how to put up. This is because they require staking to tether them to the ground.

This requires either several people or an expert to put up properly, so if you're looking for something that's easy to assemble, a tent is a more complicated option.

When it comes to color, there are a wider range of color choices available to you if you opt for a tent.

On the other hand, if you want your shelter to be fully customized with logos or information to make you stand out from the crowd, a tent is probably not the way to go.

The Bottom Line

In conclusion, there are advantages and disadvantages to both tents and canopies when it comes to events. For those wanting something that will resist any weather you may encounter, that is very durable and that can accommodate a lot of people, a tent may well be the best option for you.

On the other hand, if you're hoping to be able to fully customize your shelter with pictures or branding, or you want something that's easy to assemble and more around, canopies provide an ideal solution.

Canopy vs Gazebo – What's the Difference?

KHURAM Shehzad
Studying in Mastermind by sir M Umar

38 articles

+ Follow

January 5, 2023

Whether you're looking for respite from the sun or a sheltered spot to wait out an unexpected downpour, gazebos and canopies offer just the protection you need.

While they both provide quality shade and coverage, there are factors that differentiate these two outdoor staples, so if it's hard to make up your mind between one option or another, consider reaching out to an expert who is well-versed in their features!

From material endurance against rain/hail storms right through ventilated airflow capabilities; each of them offers different advantages, making sure your backyard structure decision is appropriately informed by comparing all components side-by-side.

Canopy vs Gazebo – What's the Difference? *The main difference between a gazebo and a canopy is height and construction. Canopies are usually shorter with a simple frame and fabric covering, while gazebos tend to be taller and more structurally complex.*

Canopies are traditionally better for smaller spaces since they take up less space, while gazebos provide more air circulation and a larger overall shade area.

Gazebos are complete structures in their own right: think of them as being self-sufficient. Canopies, on the other hand, need another framework to rely upon; they act like roofing

without walls or support beams beneath it – usually, this takes the form of cabanas or pergolas.

Canopy vs Gazebo – What's the Difference?

Canopies:

What is a canopy?

Canopies offer an array of protection from the elements, whether temporarily or permanently. They come in a variety of materials, from glass and metal to more often durable fabric.

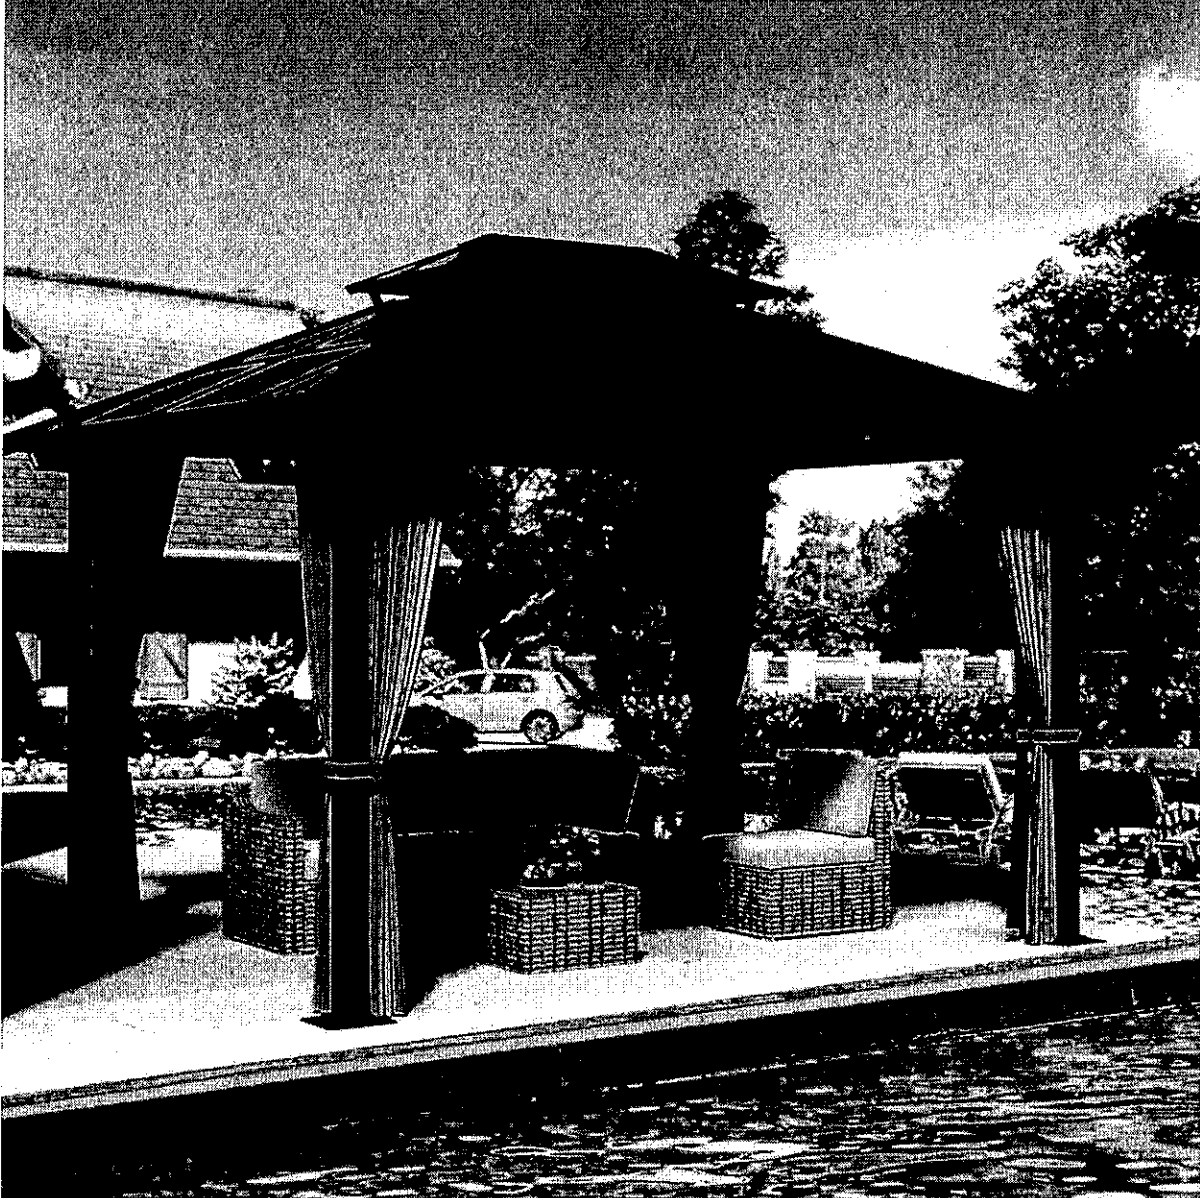

That can be attached directly onto buildings, used as stand-alone structures, or even mounted on patio roofs. Ensure you have quality coverage no matter where you may roam with this versatile form of overhead shelter!

Canopies are a popular and affordable choice for sun protection. They're typically made of nylon or polyethylene fabric, and come in a wide variety of sizes, shapes, colors, and designs.

They're easily portable and can be quickly set up with no tools required. While lightweight materials don't provide much in the way of protection from heavy rain or high winds, they are great for providing some quick shade on hot summer days.

Gazebos:

What is a gazebo?

Gazebos provide the perfect escape from harsh outdoor elements and add a touch of charm to any yard. From circular gazebos with bamboo construction for an exotic feel, octagonal structures crafted out of cedar boards creating a cozy environment, or hexagonal aluminum pieces lending chic style, your patio can have its own unique character!

Set up some chairs beneath it on warm days and enjoy intimate dinner parties in safety while soaking up all that nature has to offer.

Gazebos are a more permanent structure, typically made with metal frames and canvas or vinyl walls. They often feature windows and/or screens to provide ventilation, as well as other amenities such as benches or cup holders.

They are more resistant to the elements than canopies and can provide greater protection from sun and rain. However, they also require more time and effort to set up, making them less suitable for spontaneous outdoor events.

Benefits of Canopy:

- Lightweight and easy to transport
- Quick setup with no tools needed
- Available in a variety of colors and sizes
- An affordable option for sun protection
- Durable fabrics provide UV protection

Benefits of Gazebo:

- A more permanent structure, more resistant to the elements
- Features windows or screens for ventilation
- Comes with amenities like benches or cup holders
- Adds a touch of charm to any yard
- Durability and greater protection from sun and rain
- Functionality can be enhanced with accessories
- Diversity in shapes, sizes, and designs

How should you make your choice?

It all depends on your needs, preferences, and budget. If you need a portable shade that's affordable and easy to set up, a canopy might be the best solution for you. Canopies provide a lightweight solution that will guard against sun or rain without compromising style.

But if you're looking for something more permanent with enhanced functionality, then a gazebo could be a better option, while a gazebo also provides essential protection from harsh weather conditions. Ultimately, the decision is yours!

No matter what you decide, a canopy or gazebo can be a great addition to any outdoor space. They will provide shade and shelter for your family and friends in the summer months, as well as give your patio an extra special touch. So make sure to consider all the options before making your purchase!

Types of Gazebo:

There are different types of gazebos you can choose from to best fit your needs and budget. You can find gazebos made out of a variety of materials, such as wood,

aluminum, canvas, or vinyl. Depending on the size and features that you need, there's bound to be a perfect one for you.

Wood gazebos are the most common type, and they come in a variety of styles and shapes. They are also more customizable than other materials, so you can get it tailored to your specifications.

Aluminum gazebos are a great choice if you're looking for something that is lightweight and easy to set up. They're also more resistant to rust and other weathering elements.

Canvas or vinyl gazebos are lightweight and often the most affordable option, making them great for those on a budget. However, they may not provide as much durability or protection from the elements as metal frames do.

If you want to know more about types of gazebos [here is the guide: Types of Gazebos – Comprehensive Guide of 2023](#)

Related Articles: [Pergola vs Gazebo](#), [Gazebo vs Cabana](#), and [Gazebo vs Pavilion](#)

FAQs:

Q: What is the difference between a canopy and a gazebo?

A: A canopy provides a lightweight, portable shade that is quick to set up and can come in a variety of colors and sizes. Gazebos are more permanent structures with metal frames and canvas or vinyl walls that provide greater protection from sun and rain.

Q: What is the best material for a gazebo?

A: The best material for a gazebo depends on your needs, preferences, and budget. Wood, aluminum, canvas, and vinyl are all popular options that each come with their own advantages and disadvantages.

Q: How can I make my gazebo look better?

A: There are several ways to spruce up your gazebo. You can add accessories like benches, cup holders, and string lights for extra functionality and charm. Additionally, you can also paint the frame or decorate the canvas walls with plants and outdoor art pieces.

Q: How much does a gazebo cost?

The cost of a gazebo depends on the size and features that you choose. Generally, smaller gazebos start from around \$200, while larger models can range anywhere from \$500 to \$2000. [Here is a complete guide.](#)

Q: How much does a canopy cost?

A: The cost of a canopy depends on the size and features as well. Generally, pop-up canopies start from around \$50, while larger models can range anywhere from \$100-\$200.

Conclusion:

In conclusion, a canopy is ideal for quick shade on hot days while gazebos offer more durable protection for long-term use in any kind of weather. Consider the size and shape, materials used, how much ventilation you need, and your budget when deciding which option is best for you.

Once you've narrowed down your selection, be sure to check with an expert to get the most out of your purchase.

We hope you will be well aware of Canopy vs Gazebo. If you have any questions or queries, feel free to reach out. Thank You for reading.

Good luck!
